

► **Easy to Use**

Rain Bird's legendary Extra Simple Programming makes tailoring a watering schedule for your unique landscape foolproof.

► **Smart WiFi Connectivity**

Internet-based weather data adjusts irrigation schedules on a daily basis for up to 30% water savings.

► **Easy To Expand**

Expandable to 22 zones, the ESP-Me WiFi Compatible Modular Controller can easily accommodate any future landscape needs.

ESP-Me WiFi Compatible Modular Controller

Simple, flexible, reliable.

At Rain Bird, it is our responsibility to develop products and technologies that promote the efficient use of water. The ESP-Me WiFi Compatible Modular Controller carries on a long commitment to the Intelligent Use of Water™.

With the ESP-Me's new WiFi capability, you can access, control and monitor your irrigation system from anywhere in the world. Historical and real time Internet-based weather data can be used to adjust watering schedules automatically on a daily basis. This results in up to 30% water savings.

ESP-Me WiFi Compatible Modular Controller

WiFi Compatibility

- Easy access, monitor and operate your system from anywhere
- Automatically and seamlessly enjoy the water saving benefits of daily seasonal adjustment

Simple and Professional Programming

- With 4 independent programs, 6 start times per program and powerful advanced features, the ESP-Me WiFi Compatible Modular Controller can be easily tailored to meet the needs of the most demanding landscapes
- The oversized display and intuitive dial make it easy to train a novice user

Easily Scalable and Built to Last

- With 4-22 stations scalability, the ESP-Me WiFi Compatible Modular Controller has the highest station count in its class. Now your crews can install the same controllers in residential and light commercial projects.
- With an industry-leading 3-year trade warranty, the ESP-Me delivers reliability that you and your customers can trust.

LNK WiFi Module

A revolutionary NEW product that enables WiFi connectivity

Simple and Professional Programming

Advanced Features you'll actually use!

- WaterSense® certified when installed with Rain Bird's LNK WiFi Module and WR2 Rain Sensor – up to 30% water savings
- Delay Watering up to 14 days automatically resumes watering after delay is elapsed.
- Bypass Rain Sensor for any station gives you the ability to customize which stations react to a rain sensor.
- Total Runtime Calculator per program assures that you can complete watering in the available water window.
- Manual Seasonal Adjust by program allows you to easily reduce or increase watering by program.
